SWISS KRONO AQUA ZERO

Come what may!

Children's water experiments, uncontrollable dog joy, or a cat chasing a fly? Or perhaps walking into the kitchen with shopping bags in wet shoes, artistic shows in the living-room and overflowing Monstera's pot? What test is your floor to pass today? For all home laboratories and veritable testing grounds, we have created six collections of water resistant SWISS KRONO AQUA ZERO panels. The panels are resistant to water for up to 72 hours!

AQUA ZERO PANELS WILL SURVIVE THE TESTS OF:

- ◆ children
- ◆ house pets
- ◆ frequent watering of potted plants
- ◆ wet cleaning and cleaning with a steam mop
- ◆ interiors with direct access to outdoor spaces

AQUA ZERO 72h

DO NOT WORRY ABOUT YOUR FLOOR!

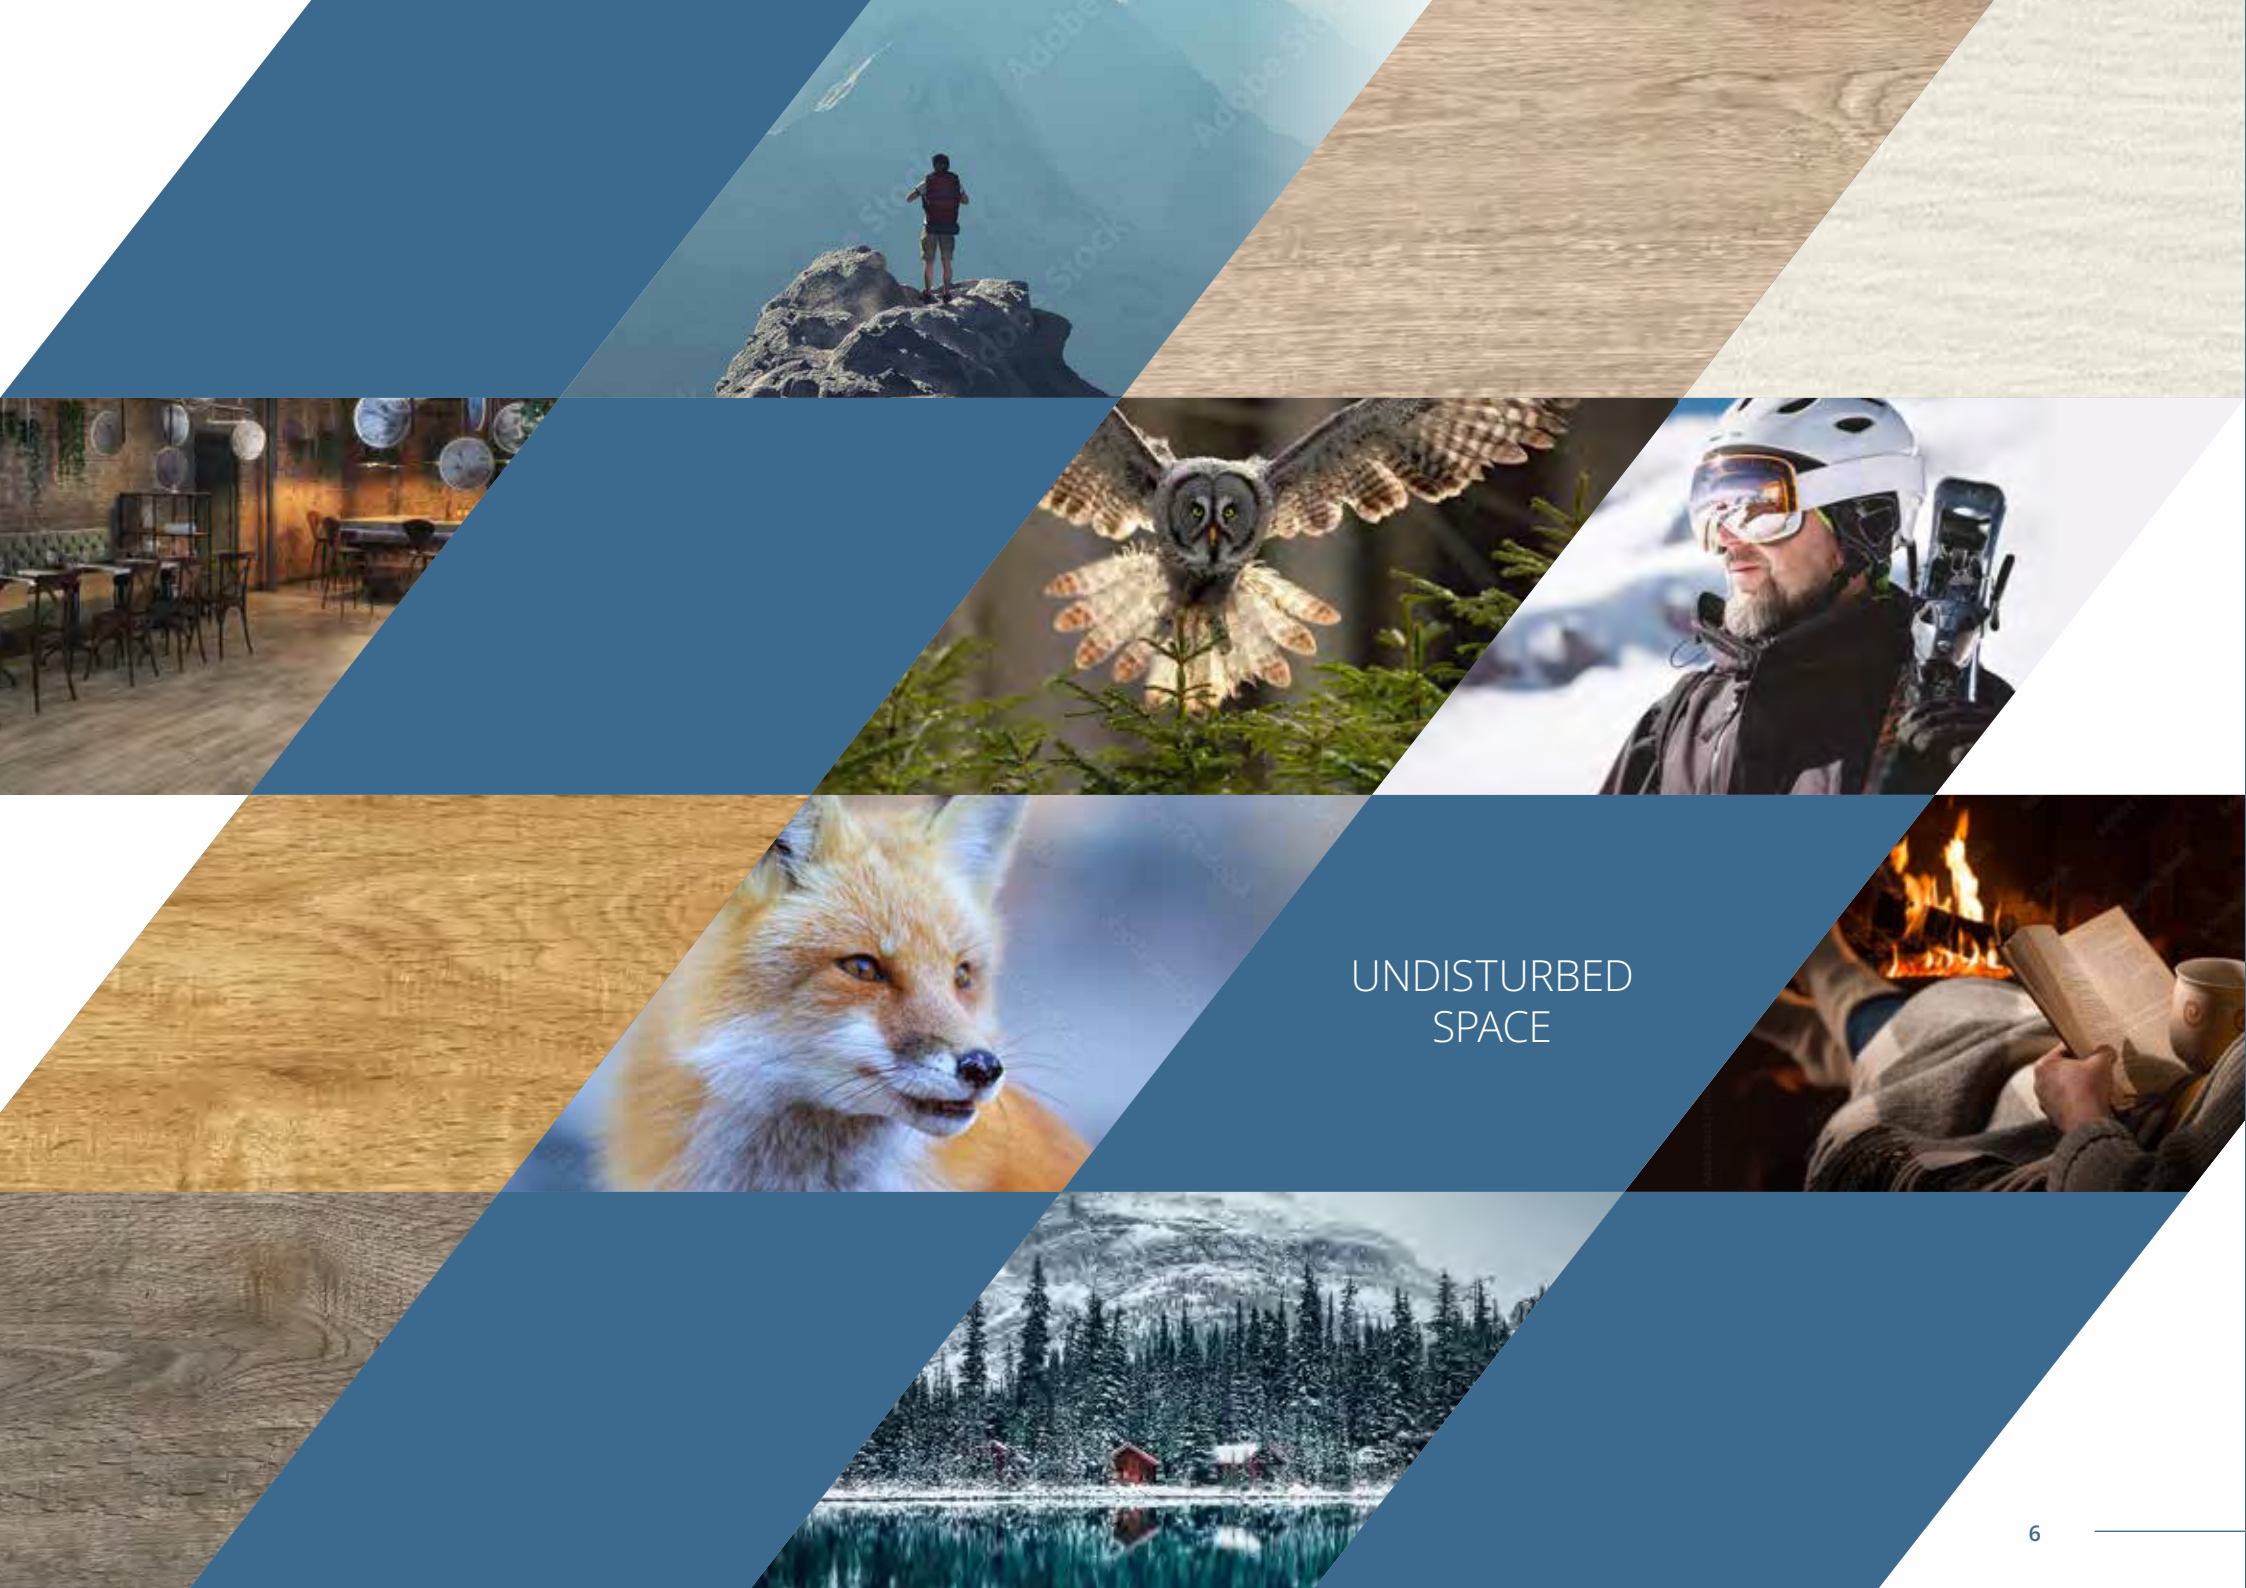

The AQUA ZERO technology consists in combining **water resistant high density fibreboard (HDF)** with the tight **Aqua Pearl lock**. A special green HDF forms the panels' solid core. Moisture, unpleasant odours, bacteria and dirt do not penetrate underneath. Frequent cleaning, including with steam mops, is completely safe.

THE EXCEPTIONALLY STRONG AQUA PEARL LOCKING SYSTEM ALLOWS THE FLOOR TO BE LAID OVER LARGE AREAS.

1. Panels to help you avoid a tough renovation journey Your time is priceless, and with floor panels you can transform your interior fast.
2. A collection tailored to your powers and abilities Even if you cannot find a professional, you will be able to lay the floor yourself and the result will delight you and your loved ones.
3. The floor in peak form The Aurum line floors mean durability guaranteed for 30 years - and even up to 40 years for the Fiori Aqua Zero Collection!
4. Panels fitted for underfloor heating The panels can be laid in rooms with water-based and electric underfloor heating systems. This way you gain the floor that is not only beautiful but warm as well.
5. Your floor's true potential The tight Aqua Pearl locking system protects the panels against water and moisture. This way you do not have to worry that the panels may get damaged.
6. Real beauty at your fingertips The Aurum panels are made in a 3D synchronous structure that brings nature into your interior. Marvel at the charm of wood in any light, regardless of the season, day or time.
7. Creating your own reality The abundance of formats and patterns allows you to create an ambiance suiting your individual style and tastes.

WATER RESISTANCE CONFIRMED BY AN INDEPENDENT TEST

The AQUA ZERO floor not only meets the NALFA test requirements but it also ensures that all its functional and aesthetic **properties will be maintained for 72 hours after water spillage**, according to the manufacturer's tests.

WIDE
HORIZONS

PLATINIUM Movie

Unique natural patterns combined with a wide board format take us into a fairy-tale space inspired by the Masurian forests. A uniform tone of oak planks without knots. Thanks to the popular 8 mm thickness, the Movie Collection allows you to match the level of the panels with ceramic tiles. It is a good choice for a living room with an open kitchen.

SWISS KRONO AQUA BLOCK 24 h

Water resistant floor

Aqua Block 24h water resistant panels can be used in all dry living rooms and many public spaces. The panels withstand 24 hours of spilled liquid on the floor surface. Aqua Block 24h is especially suitable for places with children and pets and also, where there is a risk of periodic spillage of liquid on the floor (kitchen and its wet zones, places of standing potted flowers, hallways with direct access to the house from the manor).

WHY IT IS GOOD TO HAVE AQUA BLOCK 24H

- ◆ water resistant up to 24h
- ◆ with a waterproof Aqua Pearl locking
- ◆ especially recommended for the kitchen
- ◆ with waterproof paint protecting the v-groove
- ◆ suitable for water and electric underfloor heating
- ◆ antibacterial
- ◆ easy to care for
- ◆ 3D synchronous structure – brings nature inside
